

His Polyclonal Antibody

Product Data sheet

PRODUCT INFORMATION

Catalog Number: GMTA103AP
Size: 100ul
Format: Antigen affinity purified
Raised in: Rabbit
Clone: Polyclonal antibody
Isotype: IgG
Storage: 2-8°C for up to 3 months.
Aliquot and stored at -20°C
for long term storage.
Avoid repeated
freeze/thaw cycle.

DESCRIPTION

Epitope tags are commonly used for labeling, detection and purification of recombinant proteins. Due to their small size, they are unlikely to affect the biochemical properties of the tagged fusion proteins. The his tag on the expressed recombinant proteins allows for efficient coupling to Ni⁺⁺ affinity resins and purification by a single step chromatography. GeneMay's polyclonal antibody is developed using synthetic peptide C-HHHHHH conjugate to KLH as antigen. It recognizes His-tagged fusion protein in different expression system.

Western blot analysis of extracts from E. Coli cells expressing a protein containing a His-tag, using His Rabbit polyclonal antibody (peptide affinity purified).

APPLICATION AND USAGE

Recommended Dilutions:

WB 1:1000

ELISA 1:4000

IHC N/A

Not tested in other applications.

**Each investigator is highly recommended to titrate the reagent to identify the optimal concentration for each application.*
