

Myc Monoclonal Antibody

Product Data sheet

PRODUCT INFORMATION

Catalog Number: GMTA201M
Size: 100ul
Format: Protein G purified
Raised in: Mouse
Clone: GMS.2
Isotype: IgG1
Storage: 2-8°C for up to 3 months.
Aliquot and stored at -20°C
for long term storage.
Avoid repeated
freeze/thaw cycle.

Western blot analysis of extracts from E. Coli cells expressing a protein containing a Myc-tag, using Myc Mouse monoclonal antibody GMS.2.

DESCRIPTION

Epitope tags are commonly used for labeling, detection and purification of recombinant proteins. Due to their small size, they are unlikely to affect the biochemical properties of the tagged fusion proteins. GeneMay's monoclonal antibody, clone GMS.2, is developed using synthetic peptide C-EQKLISEEDL conjugate to KLH as antigen. It recognizes Myc-tagged fusion protein in different expression system.

APPLICATION AND USAGE

Recommended Dilutions:

WB 1:500

ELISA 1:2000

IHC N/A

Not tested in other applications.

**Each investigator is highly recommended to titrate the reagent to identify the optimal concentration for each application.*
