

HA Polyclonal Antibody

Product Data sheet

PRODUCT INFORMATION

Catalog Number: GMTA302P
Size: 100ul
Format: Protein G purified
Raised in: Rabbit
Clone: Polyclonal antibody
Isotype: IgG
Storage: 2-8°C for up to 3 months.
Aliquot and stored at -20°C
for long term storage.
Avoid repeated
freeze/thaw cycle.

Western blot analysis of extracts from E. Coli cells expressing a protein containing a HA-tag, using HA Rabbit polyclonal antibody.

DESCRIPTION

Epitope tags are commonly used for labeling, detection and purification of recombinant proteins. Due to their small size, they are unlikely to affect the biochemical properties of the tagged fusion proteins. The HA tag is derived from an epitope of the influenza hemagglutinin protein, which has been extensively used as a general epitope tag in expression vectors. GeneMay's polyclonal antibody is developed using synthetic peptide conjugate to KLH as antigen. It recognizes HA-tagged fusion protein in different expression system.

APPLICATION AND USAGE

Recommended Dilutions:

WB 1:1000

ELISA 1:4000

IHC N/A

Not tested in other applications.

**Each investigator is highly recommended to titrate the reagent to identify the optimal concentration for each application.*
